

Due to a clerical error, NSPE's association management software generated an inaccurate accounting of July NSPE-PAC receipts, resulting in an inaccurate report of NSPE-PAC's receipts in the August 20 FEC filing.

Specifically, some receipts were split in half (the other half were attributed to state society PACs); other receipts were duplicated; and a few receipts were entered into the association management software incorrectly.

NSPE has corrected these errors and is filing amended reports for the periods covering July and August 2010 to reflect the actual monies NSPE-PAC received in July. NSPE-PAC also is implementing safeguards to ensure that these errors are not repeated.
